## PROFILE SUMMARY

Data Scientist and AI Engineer building production forecasting, optimization, and agentic AI systems for FMCG organizations including Unilever. Focused on Machine Learning (ML) and Generative AI (GenAI) solutions — LLMs, RAG, and multi-agent frameworks — that drive measurable procurement and margin impact.

## EDUCATION

### Jabalpur Engineering College

Dec 2021 – Jul 2025

*Bachelor of Technology in Electronics and Communication Engineering*

*Jabalpur, MP*

– Relevant Coursework: **Data Science, Machine Learning, and Generative AI.**

### Christu Jyoti Convent Sr. Sec. School

Jun 2018 – Aug 2020

*Higher Secondary (Science Stream) – 80.8%*

*Ujjain, MP*

## EXPERIENCE

### Data Scientist

Aug 2025 – Present

*Cron Labs*

*Bangalore*

- Built and productionized **multi-commodity price forecasting models** using **Prophet + XGBoost**, incorporating **seasonality decomposition, trend modeling, and external regressors**; achieved **92% directional accuracy**, enabling data-driven **procurement, pricing, and margin optimization** decisions for **Unilever's supply chain**.
- Deployed forecasting models as **5 MCP (Model Context Protocol) servers** using **FastMCP**, exposing predictive capabilities as callable tools within agentic AI workflows.
- Engineered a multi-agent AI automation platform with **4 specialized agents** using **LangChain, LangGraph, LlamaIndex, and OpenAI APIs**, enabling natural language-driven automation across procurement and planning processes.
- Delivered **production and dispatch planning analyses** on large-scale **FMCG datasets**, conducting extensive **data quality assessment, reconciliation, and operational verification**, contributing to a **20% improvement in client profitability** and a **30% reduction in logistics and dispatch costs**.
- Built ETL pipelines in **Databricks** using the **Medallion Architecture (Bronze, Silver, Gold)**, ingesting data from **12+ SAP tables**, performing data cleansing, transformations, and aggregations to create analysis-ready Gold datasets that powered **Tableau dashboards** for multiple **Reliance Retail** business categories, including Staples and Beverages.

### Data Analyst Intern

Oct 2024 – Dec 2024

*Physics Wallah*

*Remote*

- Analyzed large-scale datasets (**2M+ records**) using **SQL** and **Python (Pandas, NumPy)**, uncovering business insights through exploratory analysis, statistical profiling, and data quality assessment.

## PROJECTS

### NYC Taxi Fare Prediction | *Python, DVC, MLflow, FastAPI, Docker, AWS*

- Built an end-to-end MLOps pipeline for NYC Taxi Fare Prediction, implementing modular data ingestion, validation, preprocessing, feature engineering, model training, and evaluation workflows using industry best practices.
- Versioned datasets and models using **DVC**, tracked experiments with **MLflow**, containerized the application using **Docker**, and deployed a scalable prediction API using **FastAPI** on **AWS**.

## TECHNICAL SKILLS

**Programming:** Python, SQL

**Machine Learning & Deep Learning:** Regression, Classification, Time Series Forecasting (Prophet), XGBoost, PyTorch, TensorFlow, CNNs, GANs, Object Detection (TFOD2), Image Segmentation, Object Tracking

**MLOps & Deployment:** Docker, DVC, FastAPI, Model Deployment, REST APIs, AWS

**AI Engineering & LLM Frameworks:** LangChain, LangGraph, LlamaIndex, Hugging Face, RAG Pipelines, AI Agents, MCP, Natural Language Processing (NLP), Generative AI, Prompt Engineering, LangSmith, OpenAI APIs, n8n

**Backend & Databases:** FastAPI, MySQL, PostgreSQL, Supabase

**Optimization:** Linear Programming (PuLP)

**Data & Tools:** Pandas, NumPy, Databricks, Tableau, Power BI, Excel, Git

## ACHIEVEMENTS

---

- Completed **Data Analytics Master's Certification (Udemy)** – advanced analytics and ML concepts. **Certificate Link**

Achieved Gold Badge in SQL on HackerRank, demonstrating strong proficiency in database querying and problem-solving.
